Climate Change Impact Assessment & Justice Application

Location: Sendawula Zone, Kosovo Informal Settlement, Lubaga Division, Kampala Capital City, Uganda
Target Group: Women-headed Households

Introduction

I am being asked to take part in a study to assess the costs, loss, and damage that women-headed households have incurred in 2025 due to flooding in Sendawula Zone, Kosovo Informal Settlement, Lubaga Division, Kampala Capital City, Uganda.

This assessment is being conducted by Habitat Defenders Africa & Housing and Land Rights Network to support a Climate Change Impact Assessment and Justice Application, aimed at informing policies and responses to climate change-related damage and loss.

Voluntary Participation

My participation in this questionnaire is completely voluntary. I understand that I can refuse to answer any question or stop the interview at any time without any penalty or negative consequence.

Confidentiality

I understand that all the information I provide will be kept confidential. My identity will not be disclosed in any report, and any personal data I provide will be used only for research purposes by the study team.

Purpose of the Study

The purpose of this questionnaire is to collect information about how my household has been affected by flooding including property losses, expenses, health impacts, and changes in livelihood. This information will help advocate for climate justice and support for affected households like mine.

Risks and Benefits

I understand that this study does not involve any physical risk. While I may not receive direct personal benefit, my participation may help bring attention and support to women-headed households affected by climate change.

Consent Statement

I confirm that:

- I have read, or had this consent form read to me.
- I understand the purpose and procedures of the study.
- I voluntarily agree to participate.

By signing below, I give my informed consent to participate in this study.
